AVTEX FIBERS BOILER HOUSE IMPLOSION

*2 p.m. Monday, September 19, 2005
Former Avtex Fibers Site
400 Kendrick Lane, Front Royal, Virginia*

*Official Implosion Ceremony,
with Refreshments and Exhibit Viewing to Follow*

Celebrate an important milestone in the cleanup and preparation of the former Avtex Fibers site for redevelopment into *Royal Phoenix*, a catalyst for the future development of Warren County. The entire community is invited to witness the implosion of the Avtex Boiler House, the largest remaining structure from the former manufacturing plant at the 440-acre site.

The U.S. Army Corps of Engineers, Norfolk District, will implode the boiler house as part of its \$23 million federal project to decontaminate and demolish site buildings. Joining the Corps in the celebration are our partners in returning the site to productive use -- the U.S. Environmental Protection Agency, which is the lead agency managing the Avtex Fibers Superfund site cleanup, the Virginia Department of Environmental Quality (VDEQ) and the FMC Corp., responsible for Superfund site cleanup.
